Experience

Guangzhou Joysim Technology | Guangzhou, Guangdong

Java Developer | 11/2024 - Present

- Read the historical projects of the project team and supplement the technical documentation on the company's self-built Seafire platform, standardizing technical details.
- Use the technology stack of Spring Boot, Git, GitLab, MyBatis, Lombok, OpenAI API, etc., to follow up on the development of the company's internal systems, read the code, and submit issues or pull requests.
- Coordinate with the operations and maintenance team members to complete specific tasks such as packaging the project and tuning parameters for deployment on CentOS.
- Responsible for optimizing the Linux system using internal tools such as top, kill, and ps; performing package updates and maintenance on CentOS using yum; and setting network policies using netfilter.

Guangzhou Unicom | Guangzhou, Guangdong

Product Manager | 07/2023 - 12/2023

- Participated in the planning of the company's "Red September" activities and coordinated promotional events for over 200 universities in Guangzhou with colleagues.
- Visited promotional sites at more than 20 universities in Guangzhou, including Jinan University, South China University of Technology, and Sun Yat-sen University, to gather information from teachers and students about phone card rates and the scale of the schools, completing on-site preparations and customer relationship surveys as assigned by superiors.
- Contacted the liaison personnel from various Unicom regional branches, followed up on the progress of card sales in different districts of Guangzhou, and organized documentation to report to superiors.
